2) Model A – Institutions 2 & 4

    Model B –Institution 3

    Model C – Institution 1

3) Delivery features of institution 4: It is paper based with no web support. Learners also don't have contact sessions

4) The challenges institution 4 faced is no contact with teachers, lack of interactions with other learners which they may find it hard to convey messages. Also resources are limited can result students to be behind of schedule.

Activity 2

Distance Education Model	Model A – print-based/ contact supported	Model B – print-based/ web supported	Model C – Web- dependent (online) delivery
Materials development, production and storage	Heavy investment in paper-based materials development & production. Need for materials warehouses.	Paper-based materials development & production remains key feature of this model. Storage warehouses also needed. Digital materials also supplied to some students.	No paper –based learning materials, all materials are digital. No investments in storage warehouses. Heavy investment in technology, including learning platforms.
Materials distribution to learners	They have storages room to store their materials so that it's easy for distribution.	Storage is still needed for some meterials as some distributed to students for later use.	Material were supplied online so don't need storage place.
Student recruitment and support	There is registration done on campus & paying of fees with face-to-face orientation.	Registration mainly on campus, so is payment of fees. There is online registration for those who can afford it.	Registration and payment of fees done online
Feedback system for formative assessment	Paper-based feedback	Mixed paper based and online feedback.	All feedback is given online
